

### Border Roads and Beauty overlook rich fertile fields of Bangladesh

The lush, fertile plains of Bangladesh, a nation carved out of India, yet dependent on the productivity of India, is clearly seen from the Border Roads.

Biological relationship between different people groups in both countries, gives rise to constant problems including illegal immigration, insurgency and pilfering.

Consequential uneasy relationship between peoples of both Nations, belies the natural God given beauty of people and environment of Meghalaya, India and of Parkistan.

Domination and submission, inferiority and superiority, greed and fear, can only be overcome through the reconciling power of God's true justice and mercy which is available for all men if they would only stop long enough to think and receive it.

### Quality of Roads and Bridges

This well built expansive bridge between Tura and Williamnager complements the natural beauty.

Nurses have similar ability to build bridges in and through the Health Services in Hospitals, CHC's and PHC's but need to effectively develop and use their skills.

Bridges of reconciliation arising from the firm foundation of *wisdom*, the Wisdom of God, *insight* the Revelation of truth in action with courage.

Courage that has the strength to stand out quietly and confidently for justice that overcomes evil.

A heart, desire and commitment to Nursing,

Ability to encourage other Nurses to take advantage of opportunity.

A Nurse with vision and a tremendous amount of untapped potential. How many more like her?
